

As a Washington, D.C. commuter, and the wife of a commuter; my husband and I depend on XM to provide current traffic/weather information at any time. Of the many incredible benefits of XM radio, the traffic report is one that has saved time and sanity many times. Having the information accessible at any time, is a "hassle elimination" feature that makes my commute more bearable. I would recommend XM radio traffic reports as a deterrent to road-rage.

Don't take it away!
